Description

Attachment Injury Resolution Model (AIRM) is the ninth instalment of the Online EFT workshops series that will hone your EFT skills. This workshop is for participants who have some working knowledge of EFT. AIRM is an evidence-based Stage 2 process of Emotionally Focused Therapy that promotes repair and recovery from attachment injuries in couple relationships. AIRM is built from the backbone of Stage 1 work (de-escalation and ownership of the injury) and early Stage 2 work (sufficient withdrawer engagement work). In this interactive workshop (based on Buchanan and Brubacher's AIRM program), Dr. Herman Chow will break down each step of the EFT Stage 2 work so that the participants will have a clear understanding of the steps necessary to resolve attachment injuries. If you offer couple therapy and have couples who are stuck in their attachment injuries such as affairs, porn addiction, etc., you need to attend this workshop.

This training is ideal for participants who have a working knowledge of EFT Stage 1 work and want to dive deeper into Stage 2 work – especially around attachment injury. Teaching methods will include concise teachings, video clips, and demonstrations.

Sue Johnson and others first developed the “Attachment Injury Resolution Model” (AIRM) by focusing on resolving relationship injuries that block repairs and recovery in couple relationships. Later, Dr. Lillian Buchanan and Lorrie Brubacher developed this model into an 8-step training program (AIRM Program).

The training will be recorded but it is not available for purchase. Participants are granted 6 weeks to watch the recording.

Learning Outcomes

By the end of the workshop, the learner should be able to:

1. Define and identify an attachment injury
2. Understand EFT Stage 2 deepening work in a clear and systematic way
3. Delineate the 8 steps of the AIRM
4. Use the EFT Tango and key interventions in the 8 steps AIRM
