

McLean Noble Psychologists is a well-established group private practice of psychologists, psychological associates, and registered psychotherapists, with a beautiful office location in Markham Village.

Overwhelmed with referrals, we are welcoming applications from clinicians able to work with children, teens, adults and/or couples. Most of our work is in providing long-term and short-term therapy, but we get referrals for assessments of all kinds as well.

We have a long-standing and strong reputation in the community, and our clinicians are varied in both experience, training and areas of practice. We have a philosophy of care that drives our work and our shared ethics; Commitment to Excellence, Research Informed Care, Commitment to Diversity, Couple, Family and Community Focus, and a Best Match Policy (see our website for more description). Our working atmosphere is very collegial, respectful and highly supportive.

Our practice has supported our clients through covid-19 and we currently offer both virtual and some in-person services. There is administrative support, practice software and a practice structure that allows us to focus on what is most important; our effective delivery of psychological services.

More about our practice can be viewed at <http://www.mcleannoble.com>
